

Blood Alcohol Concentration Chart for Females ¹
 (Alcohol % in bloodstream for weight (lbs) and number of drinks)

*DUI HOME
 *FOR MALES

driving skills impaired
 legally drunk

Weight	Number of drinks consumed per hour ²								
	1	2	3	4	5	6	7	8	9
100	.05	.09	.14	.18	.23	.27	.32	.36	.41
120	.03	.08	.11	.15	.19	.23	.27	.30	.34
140	.03	.07	.10	.13	.16	.19	.23	.26	.29
160	.03	.06	.09	.11	.14	.17	.20	.23	.26
180	.03	.05	.08	.10	.13	.15	.18	.20	.23
200	.02	.05	.07	.09	.11	.14	.16	.18	.20
220	.02	.04	.06	.08	.10	.12	.14	.17	.19
240	.02	.04	.06	.08	.09	.11	.13	.15	.17

1. This guide shows, for a given individual, the Washington State Liquor Control Board's best guess as to what the breath test results would be for a given amount of drinking. There are so many variables in the formula used to calculate breath test results based upon weight and number of drinks consumed that it has limited utility as a way to precisely determine an individual's breath alcohol concentration.

2. One drink=1 ounce of 80 proof spirits; 3 ounce glass of wine; or 8 ounce glass of 5% beer.
